Yamaha SR400 „Homage“ by Benders Parts & Orderlist

In the spring of 2014 we were given the opportunity to start a cooperation with YAMAHA Germany. As one of the customizers of the Yard Built Program our first task was to remodel a brand new SR400. The result is what we call the "homage". A good chunk of Enduro, a little bit Scrambler, cheeky, playful but still minimalistic. Driving pleasure at all times, but also a confidently stylish appearance are guaranteed.

All essential parts we created and used for our kit bike, can be found on the following pages. All products that carry "Benders Special" in the name are handmade. Part numbers without the suffix "SR" are also suitable for other motorcycles. Detailed information on the individual components, especially technical data and informations concerning the assembling process, can be found in our shop. For orders, please also visit our online shop. Should there remain any further questions, please do not hesitate to shoot us an email.
